"I have been using both Blueprint[®] Fescue and Cattle Mineral for over two years. I was dealing with a lot of fescue-related troubles when my Hubbard rep first called on me – lost tails, open cows and bad feet. My rep guaranteed he could fix these problems and he did. I now have two generations with no lost tails or fescue foot and my conception rate has increased. Feeding the mineral is really simple and I like that my rep brings not only product information, but relevant industry knowledge to the table."
