

SWINE SOLUTIONS

Have new employees? Share this video on finisher pig care with them

Due to the changing dynamics of today's workforce, many of our animal care workers have limited experience with pigs. In this video, Hubbard Feeds swine nutritionist Jamie Pietig discusses the importance of feed, quality grind and water flow rate and how to create an optimal environment for both the pig and the worker.

This information will be helpful for new employees and can serve as a great reminder to current employees.
